Abstract

This draft illustrates preparation of your paper using MS-WORD or LaTeX. All papers should be submitted as MS-WORD documents or LaTeXfiles not exceeding 8 pages. Nevertheless, we encourage authors to submit their manuscript in LaTeXformat. The abstract should not exceed 200 words and must precise the paper giving clear conclusions in 10.5 point. It should briefly summarize the essence of the paper and address the following areas: Objective - briefly state the problem or issue addressed in language accessible to a general scientific audience. Method - briefly summarize the technological innovation or method used to address the problem. Results - provide a short statement of the results and findings. Conclusions - give brief concluding remarks on your outcomes. Detailed discussion of all these aspects should be provided in the main body of the paper. Authors are encouraged to refer the JScE manuscript template for manuscript preparation which is available at JScE homepage (https://jsce.com.np)—INSTRUCTIONS TO AUTHORS.

Keywords: Up to 5 words/phrases separated by commas

1. Manuscript Format Guidelines

The main body of the text will have a good introduction of the paper at the beginning. Simple language, short sentences and good use of section headings help to communicate information more effectively. Figures are important in aiding the clarity of the paper.

1.1. Type area

The manuscript should be printed in A4 size paper with 25 mm margin on top and bottom and 20 mm on right and left.

1.2. Script

The manuscript must use Times New Roman of 10.5 font size in English. Adjust line spacing (1.15) to accommodate 50 lines in the page. Hand written manuscripts will not be accepted. Number all pages starting with the title page. Please leave one blank space (10.5 pt.) between each of the following: title, author's names, address, and abstract. All subsequent paragraphs should be indented as here with no line spacing between paragraphs. A line space (10.5 pt.) should follow each section.

1.3. Title page

The first page must contain the title of the paper, author full name (s), affiliation (s), abstract, and corresponding author's name, affiliation, and mailing address.

1.4. Length

Papers should not exceed 8 pages length including figures, tables, endnotes, and references. If the paper exceeds 8 pages, justifications should be provided in the cover letter.

1.5. Tables

Insert tables in the text and number them consecutively in Arabic numerals, e.g., Table 1, Table 2 etc. as shown in Table 1. The tables should have no vertical lines. Table should have horizontal lines in top and bottom and one horizontal line below the heading row. Authors make sure all the tables are mentioned in the text.

Table 1. Caption of table

Models							
Heading 1	Heading 2	Heading 3	Heading 4	Heading 5	Heading 6	Heading 7	Heading 8
A	B	C	D	E	F	G	H
A	B	C	D	E	F	G	H
A	B	C	D	E	F	G	H

1.6. Figures

Insert the figures in the text and arrange them consecutively in Arabic numerals, e.g., Figure 1, Figure 2 etc. Original figures should be included separately in the final submission. Make sure all type face in the figure is legible when reduced to the size for publication. Pictures should be in JPEG/PNG/TIFF format. Sample has been shown in Figure 1. Make sure all the figures are mentioned in the text.

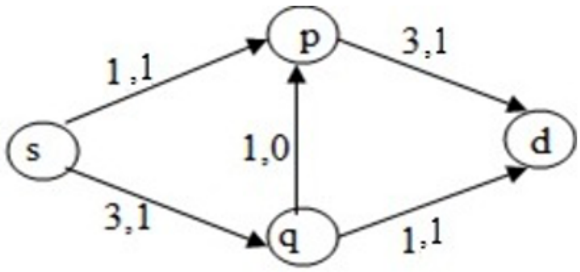

Figure 1. Caption of the figure

1.7. Equations

Equations should be written in Equation Editor/Math Type, numbered consecutively beginning with (1) throughout the paper. The number should be enclosed in parenthesis and set flush right in the column on the same line of the equation. Example is shown in Equation (1).

$$\sum_{e\epsilon\delta^{+}(i)} \int_{0}^{T} f(e,\theta)d\theta = \sum_{e\epsilon\delta^{-}(i)} \int_{0}^{T} f(e,\theta)d\theta \qquad (1)$$

1.8. Measurements

International system of units (SI) should be used. When other units are used, equivalents to SI units should be given in parenthesis.

2. Major Sections and Headings

Though, the organization of the body of the paper is at the authors' discretion, and may slightly be deviated according to the research areas; the only required sections are Introduction, Literature Review, Methods/ Procedures, Results, Conclusions, and References. Acknowledgement (just before the Reference) and Appendices (just after the References) are optional. Inclusion of Authors' Contribution section before the References is highly recommended. Each of the headings and subheadings should be numbered in numerals with bold-faced. The section headings will indicate hierarchy levels such as 2, 2.1, 2.1.1. Hierarchy of more than three is not preferred. Endnotes, if any, should come after the References section.

3. Citing References

References in the text should be quoted giving the last name of the author(s) and the year of publication of the reference in the following manner: Karanjit (2017) for single author, Khadka and Bhandari (2017) for two authors and Burkard et al. (1993) for more than two authors or (Karanjit, 2017) for single author, (Khadka and Bhandari, 2017) for two authors and (Burkard et al., 1993; Okazaki et al., 1993) for more than two authors. Proceedings, thesis, and books can be cited as depicted here (Hoppe and Tardos, 1994; Baumann, 2007; Ford and Fulkerson, 1962). The style should follow the examples as given in Reference section.

Authors' Contribution

JScE highly recommends inclusion of authors' contribution to the manuscript. The authors should provide a brief description of their individual contributions to the manuscript. This section should include the specific roles of each author in the research, writing, and revision processes.

Acknowledgment

Authors should write their acknowledgment here if applicable.
